

CLAIMS

1. – 10 (Withdrawn)

11. (Previously Amended) A cellular telephone having an entertainment module for playing pre-recorded audio and video signals comprising:

- a. a transceiver for transmitting and receiving audio and data signals;
- b. a microprocessor for controlling the operation of said transceiver;
- c. a signal processing circuit operatively connected to the transceiver and microprocessor for processing signals transmitted and received by the transceiver; and
- d. an entertainment module with a computer memory operatively connected to the microprocessor and signal processing circuits for storing audio and video signals for subsequent playback under the control of said microprocessor.

12. (Original) The cellular telephone of claim 11 wherein said memory comprises an erasable and programmable memory for storing and playing audio and video signals.

13. (Original) The cellular telephone of claim 12 including an input coupled to the erasable and programmable memory for downloading and storing audio and video signals into said erasable and programmable memory.

14. (Original) The cellular telephone of claim 11 wherein said memory comprises a permanent memory which is removable from said cellular telephone for storing and playing audio and video signals.

15. (Original) The cellular telephone of claim 11 wherein the entertainment module includes a first memory which is programmable and erasable, an input coupled to said first memory for downloading and storing audio and video signals into said first memory, and a second permanent memory having pre-recorded audio and video signals stored therein.

16. (Original) The cellular telephone according to claim 15 wherein said second memory is a removable and interchangeable memory cartridge.

17. (Currently Amended) The cellular telephone of claim 12 wherein said erasable and programmable memory is coupled to a headset port in the cellular telephone, thereby permitting audio signals to be directed from the erasable and programmable memory memories to a headset coupled to the cellular telephone via the headset port.

18. (Previously Amended) The cellular telephone of claim 12 wherein the microprocessor is pre-programmed to preempt output from said erasable and programmable memory in response to an incoming call or the initiation of an outgoing call.

19. (Currently Amended) The cellular telephone of claim 12 further including a screening memory in communication with said microprocessor for storing a list of preferred callers and wherein said an output from said erasable and programmable memory is not preempted in response to an incoming call unless said incoming call is from a caller on said list of preferred callers.

20. – 23 (Withdrawn)
